

ANTONIO STAMATOSKI

GRAPHIC DESIGNER & PHOTOGRAPHER

ABOUT ME

I am Antonio Stamatovski a graphic designer from Macedonia, living & working in Ohrid, Macedonia. Since college years, I've been working on logos, interfaces, layouts, prints and pretty much everything that involves creating a visual representation of a certain idea. I love spending hours tinkering with shapes and colors with no particular objective in sight and being surprised by the end result. I am a skilled designer and the conceptual mind behind bold and bright ideas. People telling about me that I am a creative inspirator who always brings new references to the table. I have an eye for the smallest detail which defines my work. I can reflect and analyse work precisely and never lets the bigger picture escape from sight. Sometimes I say – Let's do it all over again, because I can't finish the work if the design is not perfect! That's me! I like to apply a clean, rational approach to design, so that the message is conveyed in a clear and direct manner. I know I'm finished with a project when there is nothing more to add or subtract.

Welcome to my world!
